## CORE SKILLS

Project & Program Management • AI Governance • Responsible AI • Agile/Scrum Delivery • Cross-Functional Coordination • Stakeholder Communication • Requirements Gathering • Sprint Planning & Backlog Management • Risk & Issue Tracking • Vendor & Contract Mgmt • Reporting & KPI Dashboards • Jira • Asana • SQL

## WORK EXPERIENCE

**Marketing Technology Project Manager** | Cisco — San Jose, CA (via Teksystems Global Services, Contract)
*October 2019 – July 2026*

- AI Project Management & Innovation: Served as the first-line evaluator for internal Gen AI proposals from teams across the organization, running kickoff meetings and assessing each use case for business value, technical fit, and cost before it advanced to the next stage.
- Built the approval path and cross-functional review process for Gen AI adoption, coordinating technical, Privacy, Legal, and executive stakeholders and requiring every proposal to show a cost plan, measurable outcomes, KPIs, and projected time savings.
- Screened out proposals that did not justify Gen AI, rejecting those with a simpler non-AI solution, unacceptable PII exposure, or overlap with existing tools and features. This protected the organization from privacy risk and redundant spend, and gave teams clear criteria for future submissions.
- Led business-side execution of the Cisco.com Search migration to Elasticsearch with integrated Generative AI features, coordinating directly with engineering on requirements, testing milestones, and launch readiness.
- Martech License & Financial Management: Lead the team managing end to end the vendor license contracts and budget forecasting, centralizing contract data, renewal timelines, and cross-charge processes in Airtable to ensure financial accuracy, compliance, and continuous process improvement.
- Portfolio & Operational Orchestration: Managed the MarTech portfolio in Jira and Asana, running intake, backlog grooming, orchestrating QBR operations and the MarTech Forum to keep cross-team work on schedule, facilitate stakeholder alignment, and drive platform rationalization.
- Maintained KPI dashboards and reports in Tableau, Looker Studio, and Domo to track project performance and surface delivery risks early.
- Earned the North Star Navigator Award (Oct 2022) for hands-on execution of the Cisco.com Reimagined migration from legacy on-prem AEM to cloud-based AEM 6.5.

**Associate Product Manager** | ComplianceEase — Burlingame, CA
*February 2016 – October 2019*

- Worked directly with Engineering and QA to prioritize and scope the HELOC license feature, cutting development effort over 50% and contributing to a 66% revenue increase.
- Built and groomed the product backlog in Jira, writing user stories and acceptance criteria, and ran sprint planning and bug triage sessions.
- Designed and built the "Profile ID" feature from requirements through release, improving audit configurability and data accuracy for resellers and regulators.
- Coordinated release timelines across departments, aligning product changes with customer feedback and regulatory deadlines.
- Applied Agile/Scrum practices as a Certified ScrumMaster (CSM) to keep iterative delivery on track.

**QA Engineer** | ComplianceEase — Burlingame, CA
*September 2012 – July 2015*

- Built and refactored Java-based Selenium automation scripts for regression testing; wrote SQL queries in MS SQL Server and Access to verify data integrity.
- Authored and executed manual test cases, tracked defects in Jira, and validated fixes end-to-end.

## EDUCATION

**Bachelor of Science, Management Information Systems**
San Jose State University — San Jose, CA
